Parts List

8. Lower Door (L)

4. Roll Cage Clamp (L,R)

1. Assemble the two halves of the door and secure using two M6x25mm button head bolts.

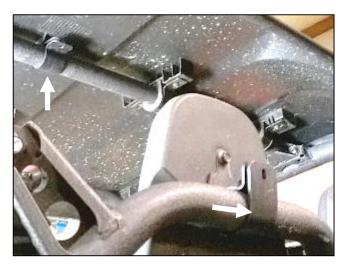

3. Attach a clamp on the top crossbar as shown above.

4. Attach a clamp in the rear upright bar as shown above

5. Attach the door hinge bracket to the front roll cage bar.

6. Attach a plastic clamp on the rear bar behind the center headrest. Attach a clamp on the rear upper crossbar as shown above.

7. Attach the Z tube to the side of the vehicle with a M6 x 35mm button head bolt on the top clamp and a M6 x 25mm button head bolt on the bottom clamp. Use 2 washers between the plastic clamps and nuts.

8. Remove the bolt behind the seat and use to install the Z bracket.

9. Attach a plastic clamp on the rear bar behind the center headrest. Attach a clamp on the rear upper crossbar as shown above.

11. Slip the top four flaps of the back panel between the rear upper crossbar and the roof and attach.

13. Pull the loop through the side of the vehicle between the roll cage and roof.

10. Attach the aluminum rod onto the top clamp with a M6 x 25mm bolt, nut and washer. Bend the rod down and attach to the other plastic clamp with a bolt, nut and washer. Make sure the bolts face inward to avoid puncturing the textiles.

12. Secure the remaining flaps.

14. Match the velcro strip near the loop and velcro on the flap and attach.

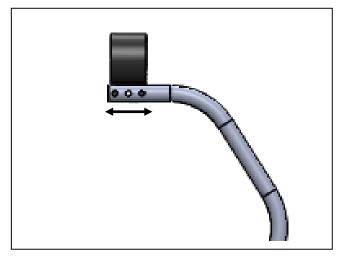

15. Secure the back panel around the Z tube. If needed, refasten the Velcro straps to adjust the fitment of the textiles.

17. Secure the back panel with two Velcro loops around the rear pillars of the cab. There is one behind the passenger and drivers seats.

19. Adjust the Z tube by mounting the clamp in the forward, middle, or rear hole as needed. This will allow you to minimize the gap between the door and the subframe.

16. Attach a strip of self adhesive Velcro on the back side of the cab on the lower crossbar. Attach back panel lower flaps.

18. Place Seizmik door on OEM Viking door and roll cage barrel clamp. Adjust position of the door and tighten the roll cage barrel clamp bolts.

20. Locate the holes on the door based on the door location. Mark and drill through OEM Viking door. Secure with bolts and locknuts.

21. Secure the remaining flaps on the front roll cage bar of the vehicle. If needed, refasten the velcro straps to adjust the fitment of the textiles.

23. To roll up the back window, unzip the vinyl section and roll up. Use the vinyl straps to secure the rolled section.

22. Attach a strip of Velcro on the back side of the cab on the lower crossbar. Attach back panel lower flaps.
